

MIDAS #0182
JACKSON POND

CONCORD TWP, SOMERSET CO., MAINE

AREA 32 ACRES

ONE TENTH MILE

JACKSON POND

Concord Twp., Somerset County
U.S.G.S. Bingham, Maine (7½')

Fishes

Brook trout
Minnows
Golden shiner
Redbelly dace

Fathead minnow
Creek chub
White sucker

Physical Characteristics

Area - 32 acres

Maximum depth - 21 feet

Principal fishery: Brook trout

Temperatures:

Surface - 73°F

18 feet - 55°F

Jackson Pond is located between Old Bluff Mountain and the Kennebec River. Two small inlets enter at the north and west corners of the pond. The outlet, Mill Stream, flows south into Martin Stream. The pond's shoreline is undeveloped.

Water quality in Jackson Pond is good for coldwater gamefish. The pond lacks spawning and nursery habitat, so it is stocked annually with brook trout to provide a fishery. Trout growth is fair with heavy competition from the abundant minnows and suckers.

Jackson Pond is accessible via a short trail off an unnamed road between the Molton Road in Embden and Route 16 in Concord Township. The pond is open with no live fish as bait in the summer months and closed to ice fishing.

Surveyed - August, 1958

Resurveyed - 1998
